Processing :

exposure	developer	dilution	time	T°C
100 iso	Rodinal	1+25	9 mn	20°C
100 iso	LC29	1+19	8 mn	20°C
100 iso	D76	1+1	11 mn	20°C
100 iso	HC-110	A	4,5 mn	20°C

For using with an unlisted developer, you can use times and dilution data of Ilford FP4.

Structure of layers :

protective layer
sensitive emulsion
subbing
polyester base
antistatic backlayer

Loading :

load 135 under shadow and take 6 empty view before shooting your first picture.
120 roll films can be loaded as usual.
While unloading the roll, it is advised to secure it with a rubber band or scotch tape.

Standard sizes :

120
135 recycled cassette (no DX code) – 24 exp.
Use of recycled cassette is not recommended with full automatic/motorized camera.

Usage tips :

The diffusion effect is stronger in 135 than in 120 format and depends of the light conditions.
120 rolls are handspooled and few very delicate camera can have issue to handle it.
Please never force on the winding lever and contact Film Washi for any question.

We take great care in the manufacture of each Film. If you are unhappy with the film for any reason please get in touch and we will do our best to help. In case of manufacturing defect, films will be replaced by new ones. No other claims for compensation will be accepted.
